Talk TechShop

Are you an inventor, maker, hacker, artist or entrepreneur? Learn about the booming maker movement and the exciting ventures at TechShop San Jose.

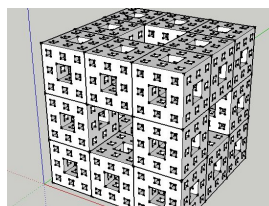

Tues., June 4, 7 p.m.

From Art to Part: Bringing Invention to Life

The essence of invention is the creation of something that does not yet exist. Whether it is a case for an electronic gadget, a mechanism for moving it, or a new iconic style, 3D design and 3D printing are unique and efficient ways to realize your invention. This program will focus on methods to identify the need, create the design and then 3D print it, including a live demonstration. Presented by inventor Andrew Filo.

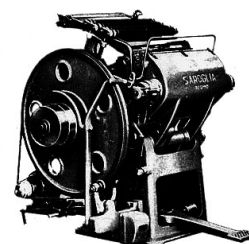

Sun., June 2, 2 p.m.

Learn to Design with SketchUp

Learn the basics of 3D modeling software Trimble SketchUp for 3D modeling and printing. Presented by Eric Welker.

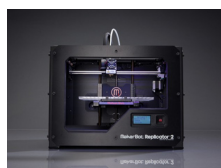

Mon., June 10, 7 p.m.

Hands-On Letterpress

Learn about the history of letterpress printing and then make your own small letterpress book to take home. Presented by letterpress expert Mike Day.
